

Focus Table Service Restaurant Management Solutions

Deliver an Exceptional Customer Experience and Increase Overall Profitability

From long wait times to slow service and incorrect orders, a number of factors can lead to a poor guest experience at your restaurant. Focus helps busy restaurants manage table seating, turn tables more quickly, and boost the average ticket size to increase the profitability of restaurant operations. Leverage table service restaurant management solutions from Focus to optimize labor, streamline food preparation and ensure the best possible customer service.

Because it was designed with table service restaurants in mind, Focus grants restaurant managers the tools required to keep a pulse on restaurant operations at all times. Restaurant staff can easily and seamlessly manage the guest experience from check in to check out. Equipped with tools like mobile and tablet POS, servers can send orders in seconds to the kitchen, bar, or other stations, improving order accuracy and customer service times. With mobile and tablet POS tools, servers can also hold and reserve tables, split checks or take orders tableside. Meal-stage notifications let servers know the appropriate times to deliver drinks, appetizers, salads and entrees.
