

ANY WAY YOU SLICE IT HUNGERRUSH WINS IN PIZZA

We’re pizza industry veterans building software to help pizza shops and chains sell more pies. But HungerRush is more than an ordering and marketing platform—our software is purpose-built to simplify the complexities of the pizza business.

YOUR RESTAURANT COMMAND CENTER

-  **Innovation for Pizza**
We’re always building smarter tools designed specifically for pizza, like OrderAI, an AI-powered, text and voice ordering platform that increases sales, fuels repeat orders, and frees up valuable employee energy.
-  **Every System, One Data Hub**
HungerRush 360 is an all-in-one, cloud based, scalable platform for restaurant management, so you can run every area of your pizza chain through one single user-friendly system and have the flexibility to grow your business.
-  **Get Modular**
Add new HungerRush features and capabilities to your existing tech stack with our API to power-up your current tools without a major back-end overhaul.

“ We pulled off a technological and marketing feat that brands 10 and 20 times our size have yet to accomplish, and we have a 2-year head start. ”
- Aaron Nilsson, Chief Information Officer for Jet’s Pizza

SUPREME CUSTOMER SERVICE

Ranked #1 in Support

Pizza is a part of our DNA. Our team is filled with former pizza industry vets from around the nation. We tailor our 24/7/365 expert support model to your needs and the needs of each one of our customers.

KEEP 'EM COMING BACK

-  **Get to Know Your Customers Better**
Keep the data you collect about your customers, without fees or limits. No third-party platform should stop you from building a customer database.
-  **Build Loyalty Anywhere**
Aggregate customer data from every ordering channel, both native and third-party, to create a loyalty and rewards funnel that leaves no customer behind.
-  **Personalized Smart Offers**
Create one-off campaigns and recurring automations with personalized offers that turn casual customers into dedicated regulars.

“ Artificial Intelligence is the forefront of combating labor shortages and rising prices. ”
- Aaron Nilsson, Chief Information Officer for Jet’s Pizza

YOUR MENU, YOUR RULES!

-  **Effortless menu management**
Complex pizzeria menus aren’t a problem with our highly flexible digital management tools.
-  **Customizable pizza pricing**
With all those toppings, orders and pricing are bound to get complicated. We help pizza brands manage complex structures for smarter, more profitable pricing.
-  **Master coupons and discounts**
Unlike many competitors, our promotion engine enables complex, multi-step coupon rules for any promo style—and the tech actually follows the rules you set.
-  **Print tickets in the right order**
We print tickets with toppings in the order that they are placed on a pie, not the order that customers request them (your kitchen staff will thank you).
-  **Manage a chain or a single location with ease**
Control the menu of multiple restaurants from a single cloud-based dashboard, or get granular with menu changes and market pricing at the regional or store level.

MAKE IN-HOUSE DELIVERY AS EASY AS PIE WITH:

-  **REAL-TIME DRIVER TRACKING:** Master in-house delivery with the HungerRush-Google Maps integration.
-  **DOUBLE DOWN WITH DOORDASH DRIVE:** Supplement each location's delivery fleet during rushes or staff shortages by accessing DoorDash’s on-demand network of drivers.
-  **DUAL PAY RATES FOR DRIVERS:** Align incentives with custom driver pay rates.
-  **CUSTOM, GEOFENCED DELIVERY ZONES:** Draw your own delivery area to ensure you're delivering hot, fresh pies every time.
-  **MORE THAN CALLER ID:** Improve call-in ordering experiences and know if it's a return customer ahead of time with Smart Caller ID.

HUNGERRUSH MEETS ALL YOUR TECH KNEADS

- ORDERS PROCESSED IN-STORE**
Manage credit card info, tipping, and order details at the in-store POS, no matter what channel the order was placed.
- AI TEXT MESSAGE + VOICE ORDERING**
OrderAI empowers your people to focus on essential tasks rather than taking orders. It leverages advanced artificial intelligence natural language processing to take orders—freeing up valuable time and resources.
- OMNICHANNEL, OF COURSE**
Offer your customers an online ordering platform, mobile app, in-store, drive-thru, and AI-powered text and voice ordering with a cohesive branded experience.
- MENU AND PRICING UNIFORMITY**
All ordering channels connect to the same central data hub for uniform pricing and menu information, so you’re never caught with conflicting prices or ingredient details.
